

Meet Nexenta.

“Our decision to go with Nexenta will save the university around \$9 million over a five year period. ‘Tier 1’ storage vendors would have charged 3 to 3.5 times more than the amount negotiated with Nexenta and yet the functionality was basically the same.”

Patrick J.A. Hopewell

Director, Enterprise Infrastructure Solutions
University of Toronto

Who we are

Nexenta is the Global Leader in Open Source-driven Software-Defined Storage. We lead the market in combining our Open Source-driven Software with the most innovative industry standard hardware to provide you the ability to maximize the potential of the storage in your data center. Today, Nexenta Software-Defined Storage manages over 2.0 Exabytes of storage.

What we do

Nexenta provides you with the functionality, flexibility and performance that you want at a significantly lower TCO than hardware appliance vendors, delivering greater value that satisfies both your current and future data center needs. By providing a software-only storage solution, including a rich feature set across your complete protocol's needs (block, file, and object), Nexenta enables you to deliver a Software-Defined infrastructure to your legacy and next generation applications, while giving you the freedom to choose the platform you want to run on.

What makes us different

Our vision. It's focused on promoting and delivering the true benefits of Software-Defined Everything. We use our vision to promote and drive open partnerships with our customers and partners, including server hardware, networking, SSDs, HDDs, cloud platforms, application infrastructure, business analytics, and everything else considered part of an IT infrastructure. We call our vision: Open Software-Defined Everything (OpenSDx).

Nexenta's Software-Defined Storage provides options for your enterprise.

Transactional Enterprise Apps

Virtual Machines

Enterprise File Servers

NFS/Block Backup & Archive

Nexenta's Storage Software Deployment Options

Bare Metal Appliances

Validated & Certified Reference Architectures
Dell, Cisco, HP, Lenovo, & Supermicro
All-Flash, Hybrid, & All Disk

VSA

Virtual Storage Appliance
Software Only Enterprise NAS
Deployed on SAN or HCI
Cisco, Pure Storage, VMware
Expand Workloads Without Adding Hardware

Multi & Public Cloud

Enterprise NAS for the Public Cloud
AWS, Google*, & Azure*
Full featured NFS & SMB, Seamless Replication to/from Private Cloud

* Coming Soon

Nexenta. Open SDS Product Portfolio.

Everything you need to truly 100% software-define your private, public, hybrid, or multi cloud.

NexentaStor

Full featured unified Block & File Services. Large Hardware Compatibility List. Virtual Storage Appliance for existing SAN or HCI Enterprise Workload, A=II Tiers

NexentaEdge

Next Generation Scale-Out. High Performance Block, File, & Object. Inline Deduplication & inline Compression. OpenStack/Object Repositories

NexentaFusion

SDS Management Simplicity. Simplified SDS Adoption, Deployment, & Scaling. Built on Nexenta Management Framework.

NexentaCloud

Delivering Scalable Hybrid Cloud Storage On-Demand. Available today in the AWS Marketplace

Don't just take our word for it...

Nexenta is installed in thousands of companies across the world, serving a wide variety of workloads and business-critical situations. We power some of the world's largest cloud deployments, host some of the industry's best entertainment content, serve vast quantities of government data across multiple continents and ensure that hundreds of thousands of medical records are kept safe and available at the point of service for healthcare companies worldwide.

Hosting and Technology

As a service provider building out a public, private or hybrid cloud, Nexenta provides the Software-Defined Storage elements to build fast, expandable, feature rich hosting solutions at a fraction of the cost of legacy storage providers.

Education and Research

Whether a university department or a large research lab, higher education and research institutions need to provide an IT infrastructure that allows users to store, retrieve, and analyze data generated by their user groups whether on campus, around the world, or from outer space.

Healthcare

Nexenta products and services enable the healthcare industry to be more efficient, cost effective and innovative; Nexenta's approach to healthcare data storage supports a robust, highly scalable file system with options for high availability, virtualization, archive, and VDI.
